Waste Reduction Page

As required in 40 CFR 262.56(a)(5) and 40 CFR 262.87(a)(5), Except for hazardous waste produced by exporters of greater than 100 kg but less than 1000 kg in a calendar month, unless provided pursuant to §262.41 [biennial report], when submitting in even numbered years:

(i) A description of the efforts undertaken during the year to reduce the volume and toxicity of waste generated:	AK Steel recycled the maximum amount of the residual tar material that is generated. The only waste material disposed are those debris contaminated items / materials that cannot be recycled back into the coke production process. Production was ceased in late June 2011.
(ii) A description of the changes in volume and toxicity of waste actually achieved during the year in comparison to previous years to the extent such information is available for years prior to 1984:	As noted above, the amount of waste disposed does not necessarily relate to coke production, therefore the amount of waste disposed year-to-year is dependent on maintenance and other handling issues that are not comparable. Coke production ceased in late June 2011.

Laura/Scott,

Attached is an electronic copy of the 2011 Annual Hazardous Waste Export Report for the Coke Plant at our Ashland Works. The hard, signed copy of the report was sent today via certified mail to your Washington D.C. mailing address. Let me know if you require anything additionally.

Respectfully,

Jeffrey A. Boggs
Environmental Engineer
